

About the author

The author of this thesis was born on January 25th, 1974 in Rotterdam, the Netherlands. She attended secondary school at the "christelijke scholengemeenschap Melanchthon" in Rotterdam and graduated in 1992. That same year she started Medical School at the Erasmus University Rotterdam. She graduated in September 1998. Hereafter, during one and half year she worked as a AGNIO neurology at the Sint Franciscus Gasthuis, Rotterdam. From 2000 to 2008 she was a resident at the Department of Neurology at the Erasmus MC University Medical Center in Rotterdam (Prof. dr. F.G.M. van der Meché, Prof. dr. P.J. Koudstaal, Prof. dr. P.A.E. Sillevius Smitt). During this period she combined her residency with research underlying this thesis at the department of Neurology of the Erasmus MC University Medical Center in Rotterdam under supervision of Prof. dr. P.J. Koudstaal and Prof. dr. D.W.J. Dippel. She set up and coordinated the COSTA study. Spring 2008, she left the region Rotterdam to live and work in Dirksland at Goeree-Overflakkee, the Netherlands. From July 2008, she works as a neurologist in the Van Weel Bethesda ziekenhuis in Dirksland.

She lives together with Mark Logtenberg and their beautiful boys, Thijmen (2005) and Fabian (2010).
